Contact

A hand-drawn sketch of a mobile contact form in portrait orientation. The form is enclosed in a rectangular border and is divided into several sections. At the top, there is a horizontal bar with diagonal hatching. Below this, another hatched bar is followed by four wavy lines representing text input. The next section contains four rows, each starting with a small square checkbox and followed by a wavy line. Below this is a row of five circles, each containing an 'X'. The main body of the form consists of four rounded rectangular input fields stacked vertically. The second field from the top is significantly larger than the others. Below these fields is a single rounded rectangular button with the letter 'b' inside. At the very bottom, there is a row of five circles, each containing an 'X', similar to the one above.
